

SMART Cowl

Universal Fitting Chimney Cowl

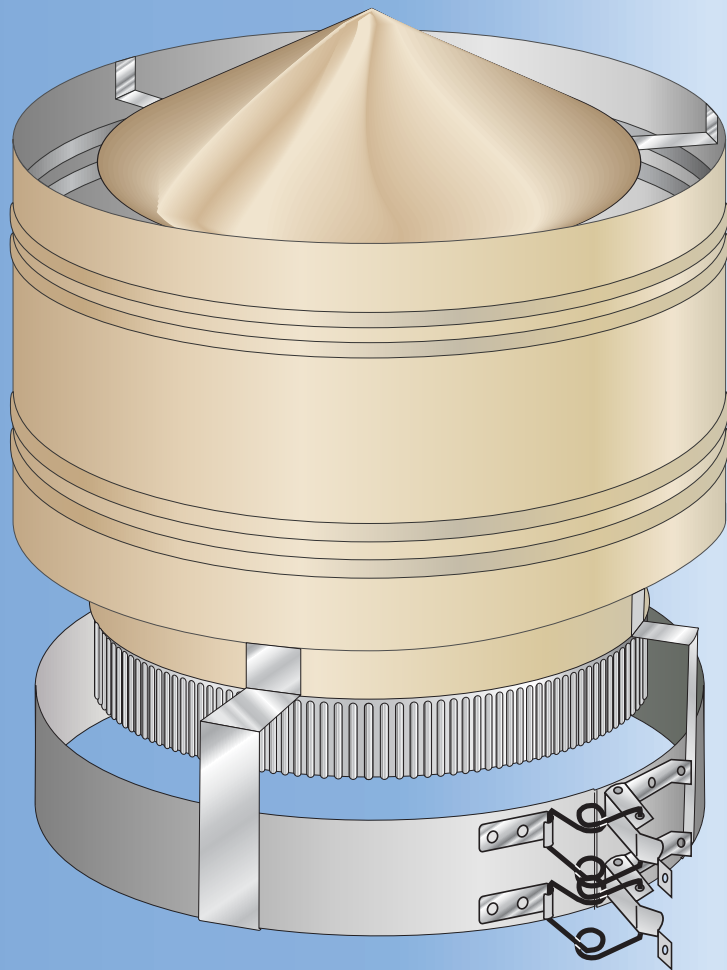

Features

- Designed to fit over an 8" (200mm) internal diameter chimney pot or extended chimney liner, the external diameter of which would normally be about 9½" (240mm).
- All stainless steel construction.
- Very easily fitted with snap over toggles.
- Helps to prevent the entry of debris and bird nesting materials.
- The skirt and dome design assists in redirecting wind movement so contributing to the prevention of down draughts.

Made from Stainless Steel, the Smart Cowl is designed to fit over an 8" (200mm) internal diameter chimney pot or extended chimney liner, the external diameter of which would normally be about 9½" (240mm). Helps to prevent the entry of debris and bird nesting materials. It is very easily fitted with snap over toggles and the skirt and dome design assists in redirecting wind movement so contributing to the prevention of down draughts.
